

# Youth Tobacco Use During Covid-19

The Monitoring E-Cigarette Among Youth Survey was conducted on behalf of the National Foundation for the Centers for Disease Control and Prevention in collaboration with the North Carolina Department of Health and Human Services.

The survey was conducted online using probability and non-probability sample sources. The target population consisted of youth (age 13-17) and young adults (age 18-24) residing in North Carolina. There were 882 survey respondents. Data was collected from March to April 2021.
